

REPORT 3 — Community Tech Donation Engagement Analysis

Prepared by: Leroy Stewart Tools: Survey Design • Excel • Looker • Quantitative Analysis

Executive Summary

This report analyses engagement, donation patterns, and demographics for a community tech-donation initiative. Survey data was cleaned, validated, and visualised using Looker dashboards.

“Cleaned and analysed response data.” “Built dashboards showing engagement and donation trends.”

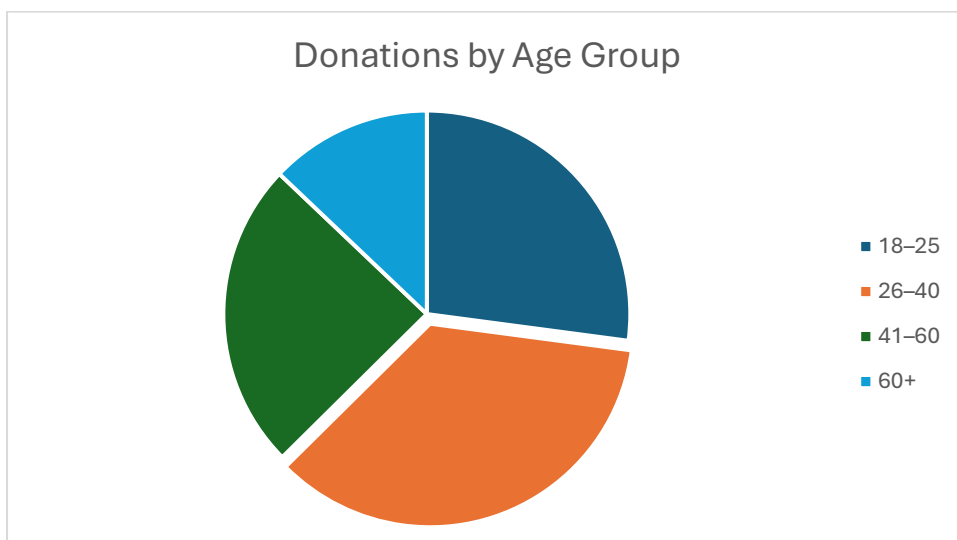

Data Sources

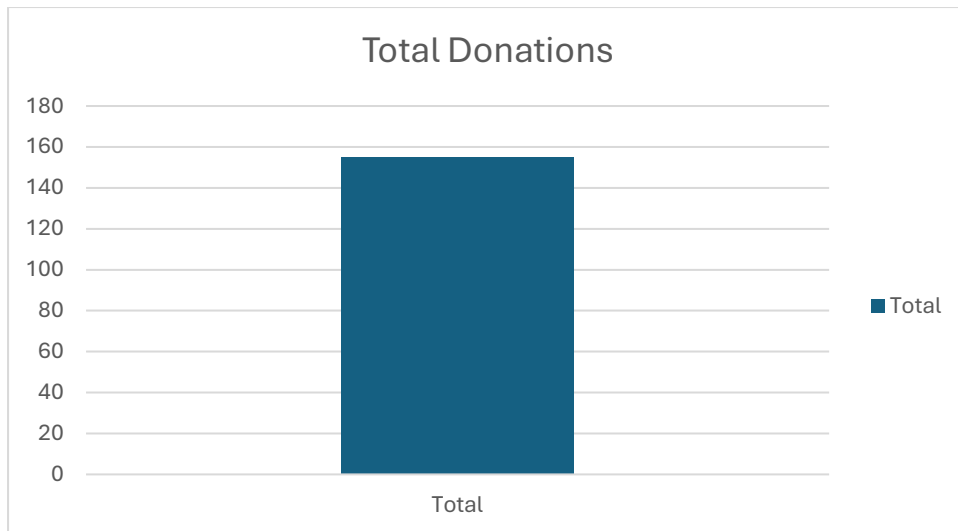

- Survey responses
- Demographic data
- Donation counts
- Engagement metrics

Key Findings

- Younger donors were more motivated by sustainability messaging.
- Donation volume increased after reminder communications.
- Engagement was highest in areas with strong community groups.

Visualisations

- **Pie Chart:** Donor demographics
- **Bar Chart:** Donation by volume

Impact

- Improved communication strategy
- Better targeting of future donation drives
- Stronger understanding of community behaviour

Conclusion

This report demonstrates my ability to design surveys, validate data, and turn community insights into simple, visual recommendations.

Drill-Through: Age Group / Donation Detail

1. Age Group Summary

- Total donations
- Engagement score
- Motivation type (e.g., sustainability, community support)

1. Item Types Donated (Bar Chart)

2. Donation Trend Over Time (Cluster Chart)

Shows donation spikes after reminders.
