

Operational KPI Dashboard

Summary

A dashboard measuring revenue, customer behaviour, product performance, and SLA risk.

Hypothesis

If customer segments and product categories are analysed together, operational bottlenecks and revenue drivers will become clearer.

Customers Table

CustomerID	Segment	Region	JoinDate	Status
C001	Standard	North	12/01/2024	Active
C002	Premium	South	03/02/2024	Active
C003	Standard	East	21/03/2024	Churned
C004	Premium	West	10/04/2024	Active
C005	Standard	North	02/05/2024	Active

Orders Table

OrderID	CustomerID	OrderDate	Category	Quantity	Revenue	Channel
O001	C001	01/04/2024	Electronics	1	299	Online
O002	C002	02/04/2024	Home	2	120	Retail
O003	C003	03/04/2024	Electronics	1	199	Online
O004	C004	04/04/2024	Clothing	3	90	Online
O005	C005	05/04/2024	Home	1	60	Retail

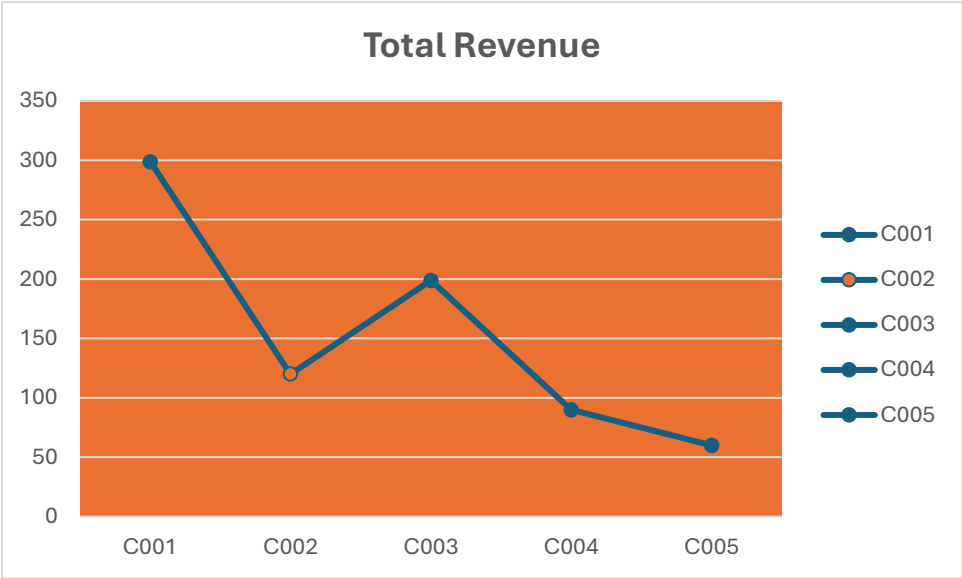

SLA Table

TicketID	CustomerID	IssueType	OpenDate	CloseDate	SLA_Breached
T001	C001	Delivery Delay	01/04/2024	03/04/2024	No
T002	C002	Product Fault	02/04/2024	07/04/2024	Yes
T003	C004	Late Dispatch	04/04/2024	06/04/2024	No
T004	C005	Wrong Item	05/04/2024	09/04/2024	Yes

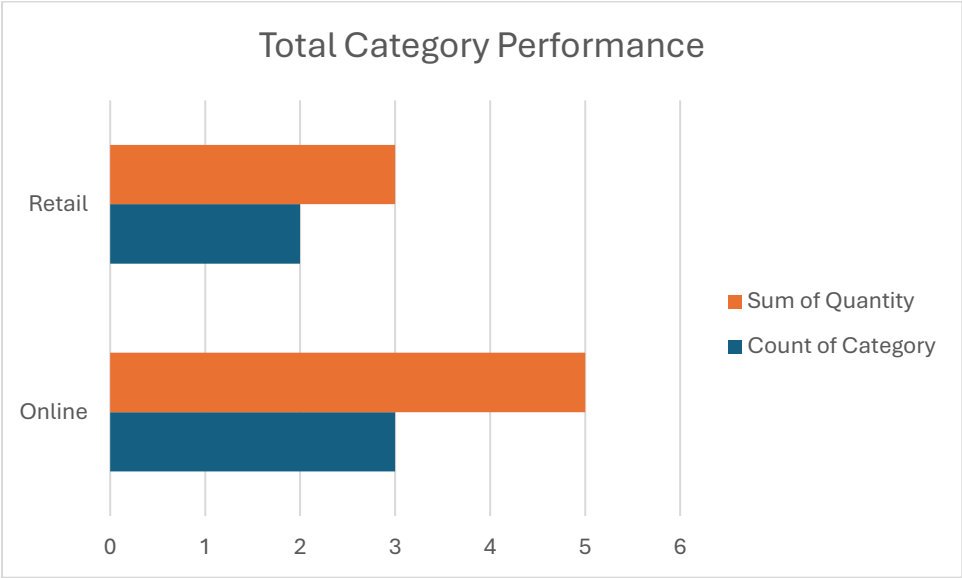

KPI Cards

Revenue	Orders	(AOV)	Active Customers
£768	5	153.6	4

SLA Heat Map

TicketID	CustomerID	IssueType	OpenDate	CloseDate	SLA_Breached
T001	C001	Delivery Delay	01/04/2024	03/04/2024	No
T002	C002	Product Fault	02/04/2024	07/04/2024	Yes
T003	C004	Late Dispatch	04/04/2024	06/04/2024	No
T004	C005	Wrong Item	05/04/2024	09/04/2024	Yes

Segment Matrix Pie Chart

Results

- Electronics highest revenue
- Premium customers highest AOV
- SLA breaches mainly product faults

Recommendations

- Improve fault handling
- Reduce Electronics returns
- Increase retention for Standard segment
